## Introduction

Hi, I am Noah burton, I am 16 years old, I came to SSL by myself I live in the small town of yea, I go to yea high school, and I am in year nine. I have ADHD but that does not stop me from doing anything. My hobbies are drawing, writing and gaming. The reason I went to SSL was because I wanted to learn what it takes to be a leader and to challenge myself as much as I can.

Yea high school is good school, but things are a bit wonky as all schools are there is of course there are some bullies and such but it's still a good school with great people that lines with the school's motto strive to excel.

## Project overview

My project is a board game night for Yea, I want to bring the people of Yea together with board and card games to have fun, it could include the older residence of Yea and the younger.

I wanted to do a board game night because it could help the township of Yea together, the main inspiration for this project was the board game nights I have at home. I think it is important to bring people together because the people of Yea have secluded themselves since covid and I think I could give people a reason to come out of their shells.

I think when my project is finished things in Yea will be more fun and interesting and people will no longer have a reason to hide who they are.

My plan is that it will be a day or night maybe once a month where people can come to play card and board games, I could bring in some food and all sorts of different games that could include people of all ages, some games would be easier such as monopoly and other kids' games and harder games such magic the gathering for older people or those who like more complicated games.

## Action plan

Things I must do to get started:

1. Contact Yea high school to see if they will support the project.
2. Contact Yea community house to see if I can host the night there.
3. Contact people who can help run games.
4. Sort out list of games to bring and source other games
5. Figure out the day to host the event.
6. Advertise the day

The thing I have done is that I have done extensive planning for the event and will get thru the list of things I need to do as fast as I can.

## Resources needed

I know I need to get permission to use the community house to host the event but if I don't get permission, I will find somewhere else to host the event.

I also need to get some help from other people to help run the show because I can't run it by myself, but I know some people who would love to help.

I also need to get some more board games but don't worry, my mum's board game obsession will defiantly help with this.

## Acknowledgment

I want to thank my home room teacher Mr. Rowan Treloar for helping me make my application for SSL and I also want to thank Mr. Clapperton and Bella for being very understanding about what I am good at and the limits I have.

I want to give a huge thanks to my mum as she paid for this experience, I also want to thank Jason (mum's boyfriend) who helped me with things at home that helped me have the strength to come here.
